- 9. Presale Model & Rewards System
- 10. Roadmap
- 11. Security, Risk & Disclaimer

1. Executive Summary

Bigrock Exchange is a next-generation decentralized exchange aggregator designed to provide fast, secure, and seamless crypto swaps across multiple blockchain networks. The platform enables users to trade across **60+ blockchains** and access **10,000+ tokens** from a single interface.

Bigrock Exchange focuses on:

- Instant multi-chain swaps and non-custodial wallet-based trading.
- Smart routing for best execution and community-driven growth.
- P2P crypto buy/sell module.

1. Executive Summary (Cont.)

Powered by advanced routing infrastructure such as **LI.FI**, Bigrock Exchange ensures optimized liquidity sourcing across decentralized protocols, allowing users to obtain better pricing and reduce friction when swapping assets across ecosystems.

The BIGROCK token powers platform incentives and rewards, supporting adoption, user activity, and ecosystem expansion.

2. Vision, Mission & Core Values

Vision

To become a trusted and widely used decentralized trading gateway that allows users to trade across chains instantly—without switching apps, bridges, or centralized custodians.

Mission

Bigrock Exchange is built to simplify decentralized trading through a single interface for multi-chain swaps, non-custodial wallet trading, smart routing for optimal execution, rewards for active community participation, and sustainable token distribution.

Core Values

Security First | Transparency | User Ownership | Performance & Speed | Long-term Sustainability

3. Problem Statement

Crypto adoption is growing rapidly, but the trading experience remains fragmented and difficult.

- **Complex multi-chain trading:** Users must manually switch networks.
- **Poor swap routing:** Low liquidity routes create slippage.
- **Cross-chain confusion:** Bridging risks and fees are difficult to navigate.
- **Transaction failure:** Gas spikes cause failed transactions.
- **Custody risks:** CEXs store funds and can freeze withdrawals.

4. Bigrock Exchange: The Solution

Bigrock Exchange removes the pain of fragmented DeFi experiences by enabling users to trade across chains instantly from one place.

Core benefits:

- Multi-chain swaps (60+ Blockchains)
- Access to 10,000+ Tokens
- Fast and secure execution
- Non-custodial wallet-based swaps
- Smart routing infrastructure
- BIGROCK rewards & activity

Built for: DeFi traders, multi-chain users, P2P traders, long-term holders, and Web3 communities.

5. Key Features

Instant Multi-Chain Swaps

Execute trades across chains in seconds with smart routing and optimized execution paths.

60+ Blockchains Supported

Trade across a wide range of networks using a unified interface.

10,000+ Tokens Available

Access thousands of tokens without manually searching liquidity sources.

Secure & Non-Custodial

Users control their keys and funds; Bigrock Exchange never holds user assets.

WalletConnect Integration

Smooth wallet connection experience across mobile and desktop.

P2P Crypto Buy/Sell Module

Built-in P2P module to improve accessibility and peer-to-peer trading.

6. Technology & Infrastructure

Routing Engine

Bigrock Exchange uses routing infrastructure (powered by **LI.FI**) to find efficient swap routes, reduce slippage, improve execution performance, and access broader liquidity sources.

Execution Model

Users connect their wallet, select token pair and chain, and approve the transaction. The swap executes directly from the user's wallet. Bigrock Exchange operates in a non-custodial manner at all times.

Transaction Tracking

Users can monitor their swap history and confirmations through platform-based tracking tools and explorers.

7. BIGROCK Token Utility & Details

The BIGROCK token is the ecosystem token designed to power incentives, rewards, and platform expansion.

Token Utilities: User rewards, ecosystem incentives, and platform growth support. Future utility may include fee benefits, premium access features, governance options, and partner integrations.

Official Smart Contract Address (BEP-20 / BSC):
0xf87ae685c44767717BB205Fc5eEaB1b9ca0Db4FE

8. Tokenomics (Supply & Allocation)

Total Supply: 10,000,000,000 BIGROCK

Category	Allocation
Presale	25%
Liquidity	15%
User Rewards	30%
Marketing	10%
Treasury	10%
Team	5%
Advisors	5%

8. Tokenomics (Vesting & Locks)

- **Presale:** TGE 10% + 12-month vesting
- **Liquidity:** Locked 12-36 months
- **User Rewards:** Controlled emissions distributed periodically
- **Marketing:** TGE 0% + 12-month cliff + 24-month vesting
- **Team:** TGE 0% + 24-month cliff + 36-month vesting
- **Advisors:** TGE 0% + 12-month cliff + 36-month vesting

> This vesting structure supports long-term stability and reduces sell pressure risk.

9. Presale Model & Rewards System

Presale Early Access

- Onboarding core users and strengthening liquidity readiness.
- Early access limited to first 2,000 premium members.
- Transparent token allocation and vesting.
- Fixed entry model with referral activation.

Rewards Distribution

Bigrock Exchange rewards users based on swap volume, platform activity, and campaign participation. Rewards are structured to support sustainability with controlled emission schedules.

10. Roadmap

Phase 1 - Launch (Completed)

- DEX Aggregator live (60+Blockchains,10000+tokens).
- Non-custodial swaps.
- P2P buy/sell module.
- WalletConnect integration.
- User dashboard & profile system.
- Backend & Transaction tracking.
- Official public launch of Bigrock Exchange

Phase 2 - Presale (In Progress)

- Goal : capital + Core users.
- BIGROCK token presale (premium 2000 members).
- Fundraise Target: $222.791.
- Fixed Entry : $111.40 per members .
- Community onboarding & Referral activation .
- Transparency on token allocation & vesting .

10. Roadmap (Cont.)

Phase 3 - Activation (Planned)

- Liquidity deployment.
- BIGROCK DEX listing.
- Launch Price at 2x presale.
- Transaction Airdrops.
- Volume-based rewards.

Phase 4 - Expansion (Planned)

- Goal scale users & volume.
- Focus : Singapore USA , Turkey, Nigeria and more.
- Strategic partnerships (Wallet protocols).
- Influencer marketing .

11. Security, Risk & Disclaimer

Security Model

Non-custodial platform: users control keys, approve transactions via wallet, and Bigrock does not store user funds.

Risk Disclosure

Crypto and DeFi involve risks including market volatility, smart contract vulnerabilities, liquidity risks, network congestion, and cross-chain execution limitations. Trade responsibly.
